

Coding Standards & Guidelines

Our entire project was written in JS and React/JSX. We chose to use the linter ESLint (<https://eslint.org/docs/rules/>) along with the VSCode formatter, Prettier (<https://marketplace.visualstudio.com/items?itemName=esbenp.prettier-vscode>) in conjunction in order to format our code.

All functions and variable names were otherwise written in the camelCase style, and all functions were declared with arrow (=>) operators in the functional style.
